School Jotter
School websites made easy
School Jotter
Outstanding, content rich websites.
Easy to manage and update, anytime, anywhere!

School Jotter is used by over 2500 schools and growing. It is revolutionising the way websites are built, providing attractive, feature rich school sites that busy teachers can manage in a couple of clicks, with minimal training or technical experience.

Use a School Jotter website to:

☑️ Showcase your school
☑️ Communicate with parents
☑️ Link to resources
☑️ Publicise events
☑️ Raise funds

and much more...

Commission a custom design or choose from a wide range of themes to promote the brand and ethos of your school.

Adele Kerr - Principal, Enniskillen Integrated Primary School

“We’ve found School Jotter really easy to use, In a busy school environment the website can go to the bottom of your pile of jobs to do, but when you have a website that’s as easy to create and maintain as this, life is made a lot easier.”
What is School Jotter?
School Jotter is a website content management system (CMS) built especially for teachers.

Because School Jotter is web-based, you can update your website from anywhere with an Internet connection, giving you the freedom to work wherever you prefer, and the flexibility to make urgent changes or updates without having to go into school.

School Jotter allows multiple editors to publish and edit content from a single, clear, centrally managed interface. Domain and hosting services are all provided by Webanywhere. School Jotter is designed to provide a consistent experience across PCs and mobile phones, allowing users to engage with your site whether at home or on the move.

School Jotter is user-friendly, but that doesn’t mean you’re on your own once you sign up. Support is available through email, live chat and telephone.

All School Jotter packages come with full training for your staff to ensure even the most non-technically minded user is able to contribute to the school website.

What is a CMS?
A CMS is software designed to make building and maintaining websites easy for people with no technical expertise.

Using a CMS to manage your website lets you maintain control of your school’s online identity. Unlike traditional website services, a CMS will allow you to make your own changes to your website rather than pay for someone else to. With School Jotter there are no hidden charges or hourly rates.
Features of School Jotter websites

**Slideshows & Galleries**  
Allows you to add photos to your website to engage visitors.

**Calendar**  
Let everyone know about school holidays, trips, training days, concerts and more.

**Contact forms**  
Enable parents to contact school via the website, or provide a newsletter signup form, allowing you to keep in touch via bulk emails.

**Custom forms**  
Create surveys, the perfect way to get feedback from parents, or make things like absence forms easily available.

**Google maps**  
Maps can be added to your website so visitors can easily find you, or an event you’re holding.

**Mobile app**  
With our School Updates app, available for free download on Google Play and iTunes, all the latest updates from your website are available on demand from mobile devices.

**Staff directory**  
Staff photos and contact details can be added to an easily searchable database displayed on your website.

**Twitter / RSS feeds**  
Interesting feeds can be added to your homepage to help keep your content fresh. Add your own accounts to communicate updates in real time.
Search boxes
Allow visitors to easily navigate your content or find out more from the wider web.

E-learning resources
Easily added to your website, Webanywhere’s bank of exciting learning resources

PayPal
A button can easily be added allowing you to collect donations for your school.

Multimedia modules
Add videos, podcasts and presentations to your website for a more engaging experience

Share
Share your School Jotter website with social network sites such as Twitter and Facebook.

Web stats
All visitor data can be broken down in clear graphs and comprehensive figures allowing you to assess the effectiveness of your website and make strategic improvements.

2. Fill in your school’s details and choose a username & password
3. Choose a template by clicking ‘Manage’ and then ‘Themes’
4. Start creating pages and uploading your content
Many schools choose to combine School Jotter with our Primary specific VLE Learnanywhere, and our innovative e-portfolio Learner Journey. We call this the Spongee Package.

Learnanywhere

Whatever your school’s aim, from improving pupil achievement to raising the quality of teaching, the Learnanywhere VLE gives you the tools to succeed.

Learnanywhere meets Primary Schools’ specific needs for a robust, scalable yet simple to use VLE without the complexity or higher cost of alternative systems. It enables effective online lesson planning and homework management, and encourages collaboration, parental engagement and resource sharing.

The attractive design, colourful learning buddies, on-screen rewards for achievement and intuitive controls helps capture the imagination of pupils, creating eager, independent young learners.

Learner Journey

An e-portfolio and safe social network for schools, allowing students to take control of their own online learning space.

Students use Learner Journey to build a record of work, activities and achievements, creating a media rich online record of achievement that can be taken with them once they leave school.

In contrast to paper based portfolios, Learner Journey allows pupils to collect and display a wide range of digital content, from videos, audio recordings, blogs and images. It is also accessible anytime, from anywhere, and will not get lost!

Learner Journey is also a safe social network, allowing communication and collaboration with peers in a safe, moderated online system. Learner Journey harnesses the positive aspects of social media platforms and makes them appropriate for a learning environment, removing the risks associated with using public social media websites at school.
